This book helps you sort through a lot of movies and get to the best of the best. The "after viewing" discussion prompts are helpful to begin good family conversations. 4 of 4 people found the following review helpful. Resource For More Than LDS Families By Ruth A. Hill First of all, I am not LDS nor

affiliated with this church, but I do appreciate their books and many of their teachings. I often trust their recommendations when it comes to all sorts of media. This is why I chose to read this particular book. I was completely impressed with the layout and premise of this book. The author has his own website, and he actively reviews movies with family in mind. He even spoke of how his views on what is appropriate and what is not has changed over the years. It is important for all faith-practicing individuals to make their choices on what is appropriate a personal decision between you and God. I whole-heartedly agree and appreciate his view on this. The 250 movies he chose are not exhaustive, but I have to say that some of the inclusions surprised me. In fact, he challenged me to consider some that often have received bad press and negative reviews. For example, I know that Tim Burton's films are well done, but I assumed that his kid's films were bad. Due to the author's reviews and recommendations, I have realized that what I believed may have been wrong. My daughter was very happy to learn that I have relaxed my standards to a degree, and I am now open to movies that may not be of interest to me but are not inherently bad. I recommend this book to families who truly care about watching quality films that have good messages. All potential problems with recommended movies are stated in an easy-to-comprehend way, and positive messages/teaching moments are also pointed out. There are several Mormon films that are of no real interest to me, but the vast majority of the films are good, wholesome entertainment. I was sent a copy of this book in exchange for my honest review. I was not financially compensated, and all opinions are 100 percent mine. 8 of 9 people found the following review helpful.
