It includes snippet interviews of the other UP film series, but these are identical to what you will find in the "flashbacks" in the 42 UP film. There is a little bit extra here from the 35/42 Uppers than in the movie but not enough to be hyped as "never-before-available out-takes from 35 UP and 42 UP". The interviews themselves are raw transcripts without descriptive comments like "sighs", "laughs", "winces" which would help put the verbal comments in perspective.It saddened me to see such classy people like Michael APTED and Roger Ebert involved in this book project which clearly came from a

marketing person. This book will not enhance your experience of 42 UP in the least. My advice is to get the 42 UP series DVD and listen to Michael Apter's commentary track. It contains much more information than is found in this book. 0 of 0 people found the following review helpful. 42 Up By Martha W. Hutson I have seen most of the movies about these British children, filmed every seven years from childhood on. It is a fascinating study of how personalities seen in children remain ingrained through adulthood. 0 of 0 people found the following review helpful. A very simple psychological study--By Nancy Griner Very thought provoking. The more people are different, perhaps, the more alike they truly are. The subjects retain their identity from 7-42.

A richly illustrated companion volume to the acclaimed 7 Up film series -- a fascinating study published to coincide with the film release of 42 Up.

About the Author Michael Apter has directed feature films in the U.S. and in England, including *Gorillas in the Mist*, *Nell*, *Coal Miner's Daughter*, *Gorky Park*, and the British Academy Award-winning 7 Up series.
