**From BookSurge Publishing : A Book Written by the Internet** before purchasing it in order to gage whether or not it would be worth my time, and all praised A Book Written by the Internet:

0 of 0 people found the following review helpful. A must-read for any computer geek!By Steven HallettI can't believe there aren't any reviews on this "book" yet. I received this as a gift a year ago, and as I read through it I went from grinning to full-on outbursts of laughter and tears. There is some damn funny s\*\*\* in here. It's small, it's cheap, and you should buy 5 copies right now. One for the bathroom, one for the man cave, and 3 to distribute to your buddies. You're welcome. Pied

This book is entirely comprised of quotes blatantly stolen from the Internet Quote Database, also known as Bash.org. But these weren't Bash's to begin with. They belong to no one. They belong to the Internet. They're the biblical stories of the Internet's first chat system, IRC. Internet Relay Chat connects millions of people around the world with each other, and not all of these interactions are harsh and violent, like those recounted here. But, yeah, actually, they kind of all are. IRC is the bathroom wall of the Internet. You can find anything you need on IRC if you look hard enough. If you're perplexed by this tome, you should read up on IRC and how it works. There are thousands of servers, or cities, each divided into thousands more channels, or rooms. Some are monitored and controlled, others are wild free-for-alls amidst homosexual jokes and ASCII art. Anyway, on with the show! IRC is just multiplayer notepad. -The Internet
