Now I know I'll need a sword at least, and a healthy distaste for wizards. Beware though, this book is not some novelty item. It is long and detailed with a healthy backstory of the Adventure Time universe. My daughter loves Marceline, so she got a big kick out of it. 2 of 2 people found the following review helpful. Must have book for AT fans! By Klaymor The Enchiridion half: It has all the humor of the show with a few nods to the overall mythology of the show thrown in. It doesn't give you insight into individual characters, but you

have the sense it was written from the perspective of someone important from the AT universe long ago. Fans will love the scrap book half of the book because it gives you insight into Simon before he wore the crown, his time in the apocalypse with Marceline struggling against the crown's influence, Marceline's adolescence, and her time spent vampire hunting as seen on the show. 2 of 2 people found the following review helpful. Great great book! I am a HUGE Adventure Time fan and this book was simply fantastic. It's fun and helps you visualize what you'd be like as a hero in the land of Ooo :P And don't be bummed out about the whole two books in one thing. It's done in a way that isn't immensely cheesy and has a cute story behind it. Both books are beautiful with wonderful art and great characters. My only problem would be the inconsistency with Shwabl's coat color in the show/book and a little more in the hero section wouldn't have hurt :P

Dive deeper into the secrets of Adventure Time with this mysterious mash-up of The Enchiridion (the ancient book for heroes, as featured in several key episodes of the series) and Marceline the Vampire Queens childhood diary. It's like having two books in one . . . because it is two books in one! Don't believe it? Just peek under the dust jacket! When you've finished reading The Enchiridion, flip the book over and dig in to Marcy's Super Secret Scrapbook!!! Or vice versa! It's your call where to start. We'd suggest you read The Enchiridion first, but why listen to us?
