One technique, the vec or visualized emotional cue, is basically THE technique for creating subtext in a screenplay- you'll see it all over professional scripts, and this is the only book I've read that explains it- its worth the price of the whole book. 1 of 1 people found the following review helpful. A Hidden Gem By Adam

Janssen This is definitely a hidden gem. It's probably the best screenplay book I've ever read. The only reason I am giving it four stars instead of five is that I got the ebook version and it was not formatted that well. Other than that, I would recommend this book to anyone! 0 of 0 people found the following review helpful. The best tool in the writer's tool chest. By GIPSEE Blake Helping me rework my script from stage to screenplay. This should be in every writer's tool chest.

With clear logic and accessible language, *Anatomy of a Screenplay* goes beyond the rigid-rule and subjective approaches to screenwriting to show a flexible and accurate way of understanding a screenplay. Dan Decker's revolutionary theories of Character Structure, Drive Structure and Convergence are presented to the public for the first time in this book.

About the Author Dan Decker is the founder and director of The Screenwriters Group and has taught screenwriting in cities all over America to audiences from professionals to high school students, where his skills at communicating the essence of screenwriting have been honed. Mr. Decker's students have sold the scripts developed under his guidance to television and feature film producers. Mr. Decker also operates Stylus Management, a writers' management company, and has sold a number of his own screenplays.
