Albert Rodney Daniels : Number Fun before purchasing it in order to gage whether or not it would be worth my time, and all praised Number Fun:

0 of 0 people found the following review helpful. If you like a challengeBy Tom NewnamMy brother gave me this book along with his challenge that I wouldn't be able to figure out the fascinating puzzels between the front and back cover. Well, he was mostly right. Although I was able to get the hang of it eventually. The reason I rate this book so highly is because, somehow, even for a non-math person like me - I found it almost addicting. The title says it all. It really is a lot of fun. I recommend the soft cover version. You'll like "working" the pages.0 of 0 people found the

following review helpful. Great Fun for all agesBy E. R. NewnamVery cleaver and lots of fun to solve. Mr. Daniels did a great job of giving you a start but it's up to you to finish.

This book is like 210 individual puzzles while at the same time it is one very large puzzle Things needed to play this game 1 A handheld calculator 2 A pencil with a good eraser 3 A good amount of patience 4 At least some interest in puzzles Age requirement Good for any age if you can add and subtract and use a calculator To try this without a calculator would require reams of scrap paper and lots of time

About the AuthorMr. Daniels holds a Bachelors and a Masters Degree from the University of Delaware. He has been a member of MENSA for the past 25 years. He is presently retired from 30 years of teaching.
