Number Word Search Puzzles Cozy up with this giant collection of number search puzzles and you will be training your brain while having fun. Number find puzzles are similar to traditional word search puzzles, with one big

difference: the grid is full of numbers! Searching for numbers can be even more challenging (and rewarding) than searching for words. With only ten possible digits (from 0 to 9) there are a lot of chances for you to be fooled along the way. This means more training for your brain as well as a chance to maintain sharp eyesight. The grids in this book are all 17x17 and each grid contains 21 special numbers for you to look for. The numbers are hidden in all directions. They may appear forwards or backwards, vertically, horizontally or even diagonally. So you will have to look carefully to find them all. The numbers you will be looking for range in length from 5 digits to 10 digits. We estimate that each number find puzzle should take about 30 minutes for the average searcher to solve, but you may find that they may take you more or less time depending on your skills and motivation. Of course, it doesn't really matter how long it takes, we are sure you will enjoy these high quality puzzles. The grid and accompanying numbers are printed in 15 point type. While this is not enough to qualify it as a large print book, the grids and numbers are quite ample and certainly good for anyone with normal corrected vision and motor skills. We hope that you or whomever you purchase this book for, enjoys many hours of puzzling fun. Number search puzzles are a great way to unwind and train your brain at the same time!

About the Author Kim Steele is the owner and publisher of [puzzles-to-print.com](http://puzzles-to-print.com), a puzzle design company located in the sunny south of France. Be sure to stop by the website for lots of free printable puzzles and more puzzle books.
