Arthur Wiebe : Pentominoes before purchasing it in order to gage whether or not it would be worth my time, and all praised Pentominoes:

This is a beautiful hardwood Pentominoes set in wood box with cover. A pentomino is a flat shape made of five wooden squares that touch one or more of their neighboring pieces on one to four sides. It's kind of a convoluted definition, but it's a great puzzle that players of all ages can master. Pentominoes from Creative Craffhouse are two layers deep, with 12 distinct pentomino shapes covering five squares each. The total area of the puzzle is 60 squares. The object of the puzzle is to rearrange the pieces into different shapes or challenges. Dimensions: 4.75" x 5.5" x 1.25"Difficulty level: 4 (out of 6)Click here to watch a video
