(The Norton Library):

Perspectives on Schoenberg and Stravinsky is an analytical and historical study of the twentieth century's most influential figures, by Milton Babbitt, Arthur Berger, Edward T. Cone, Robert Craft, Claudio Spies, and others; with new bibliographic and discographic studies prepared especially for this revised edition. This new series of Norton books, devoted to informed discussion of contemporary music, draws principally upon articles first published in Perspectives of New Music, which Richard Kostelanetz has described as among the most consistently interesting magazines in America. The Perspectives books will comprise a repository of the clearest thinking and most serious writing about twentieth-century music, forming an essential addition to the libraries of both professionals and amateurs concerned with understanding recent developments.
