By Rene Lanctot For those who are musically challenged (I don't play any instruments) this is a great setup if vocals are your thing. I am taking singing lessons and the teacher needed the music sheets to play along with me. I, on the other hand, needed the melody and music to sing to when not in class. This worked amazingly well!!! I practice at home to the same piano melody my teacher plays, and when I'm feeling up to it, there are additional music tracks for the same songs (just like in the musical) that I can sing to. In other words there are two tracks per song. One teaches you the melody (the way to sing it)

, the other is the music to sing the melody to. And if you play piano or guitar you have the music sheets to go by. The folks that put this together really know what they are doing! It did take a few weeks to get to me (it's from Canada and I live in Canada?) but it's worth every minute/penny!!!! 0 of 0 people found the following review helpful. great music book
By Thomas J. Marth
Purchased for my son, who fell in love with the music and wants to sing a solo at the school concert. This book has the words/vocal part, and was perfect because it has the accompaniment CD so he can sing along and practice independently. I had also hoped he would use it to play the music on piano, but the accompaniment is written for an upper intermediate level - a little more challenging than I thought it would be. Overall, though, a great book and very helpful CD.

I bought this because I play the piano and my boyfriend is very into the Phantom of the Opera. The songs are fairly easy and fun to play and are arranged quite well.
