3 of 3 people found the following review helpful. best practice notebook available for piano students By LuisaWL This is an excellent practice assignment book for piano students. My entire studio uses this, and it helps me have a record of what each student has played over time, as well as a way to show parents what we've studied in lessons that day. There's a postcard section at the top where my younger students write me postcards --- very cute to read those! 1 of 1 people found the following review helpful. Very helpful By ChristiePI It is a great addition. It is well organized and my 9 year old is easily able to find his assignments and record his own practice times. Wish I had it for my older son when he first started. 3 of 3 people found the following review helpful. It's all there By qwertyfour I love it that they wrote out

the days of the week for the section where the students write in their practicing time. I just circle the first day that they should start writing things in and away they go! They also did a nice job giving you space to write thoughts and encouragement. Book type is also written so a teacher doesn't have to be writing that every week. Saves on time at the lesson.
